

## The Options Alchemist

What are the 10 secrets of options trading?

A new book has just been published that answers this question. Read it and use the secrets within and you too may learn how to generate DOUBLE-DIGIT ANNUAL RETURNS with minimal (and manageable) risk using a wide-variety of options strategies. Options traders like to make lists. Sometimes they contain 3 items, at other times more. Imagine equating options secrets to the ancient art of alchemy. In doing this, you come up with 10 specific strategies and rules for smart options trading. Michael Thomsett has been trading options for over 35 years. He is the best-selling author of educational books on investing with options and has already helped millions of investors all over the world learn the craft. Now he and his apprentice Michael Stoppa bring you a new book -- one filled with secrets about how to improve your own options trading. And it all begins with...Alchemy? We'd like to tell you a little tale its the story of a novice trader named Thurston Marley who was given an amazing gift the chance to learn 10 Secrets of Options Investing from an options master (who it just so happens was also an alchemist). Now learning the secrets of successful options investing was a gift that could surely change Thurstons life (and perhaps yours too!). However Thurston didnt understand how a medieval science that was allegedly focused on the impossible task of trying to turn lead into gold could be related in any way to modern-day options trading. Luckily for him (and for you), Thurston was willing to accept his mentors advice and therefore he learned a little about alchemy and a lot about successful options trading. So, are alchemy and options related? Can you really turn lead into gold? Well if you consider options gold to be the ability to generate double-digit annual returns with minimal (and manageable) risk, then Thurston would now tell you the answer is

YES you can turn investment lead into gold by becoming an Options Alchemist. Are you curious to know more? Well, put on your alchemy robes and lets get started
