This book is a valuable resource for anyone about to start their career in the corporate world. Its geared towards technical students with degrees such as computer science or engineering, but the principles in this book could apply to anyones career. The best way to determine what your career will look like is to plan, ahead of time, what you will look like. The decisions you make right now on what your character, attitude and work ethic will be - these will determine how your career goes much more than any event that happens to you at the company who hires you. It takes more than technical skills to succeed, even in a high-tech job. Successful people invest time and effort in building their reputation and relationships. Whether youre an engineering geek, a salesman or a manager, the career lessons in this book will provide you with a foundation for success.
